

PROTECT YOUR CAR & INCREASE THE VALUE ON YOUR HOME

YOUR TRUSTED SOLUTION - CARPORT AUSTRALIA

Your Trusted Solution

A carport is an ideal place to store your car if you don't have a garage, don't want to install a garage or have limited space. Carports from Carport Australia are expertly designed to protect your car from harmful weather elements like heat, rain and wind.

Installing a carport adds value to your property while creating a protected space where you can keep your car or store equipment. They can also be used for extra storage space outside of the home or as an entertaining area for small gatherings!

At Carport Australia, our team designs and builds a carport that complies with your local council regulations. You don't have to worry about the specifications because we'll take care of everything for you.

Carport Australia can build your dream carport in **only 7 days!**

About Us

Carport Australia is home to our expert certified carport installers with 30+ years of industry experience.

Generally, adding an carport to your home is quick and easy. However, you need to ensure that it's done correctly to avoid structural problems in the future.

For example, you have to make sure that the property's fascias and eaves are sturdy enough to hold the weight of the carport. Partnering with the experts at Carport Australia means you can be certain that your new carport is built to the highest standards.

To make sure your carport is installed correctly, it's best to get professionals to build it for you. Carport Australia is the leading installer of carports in Sydney and surrounding areas.

We ensure that your carport is designed and built according to the local council regulations so you don't have to worry about compliance.

We also offer a wide range of carport designs you can choose from, along with customisable options to make your carport blend in seamlessly with your existing property.

Carport Australia is one of the most trusted carport contractors in Sydney. We design and construct carports using genuine COLORBOND® steel from Bluescope Steel Australia.

We take care and take time to get to know our customers so we can offer you the best carport solution to fit your needs at a reasonable price.

By using COLORBOND® steel, Carport Australia guarantees:

1 Custom Carport Designs

Carport Australia's team of carport builders can design and customise any carport design for residential and commercial properties in Sydney. COLORBOND® steel is uniquely suitable for the Australian climate.

5 Rot & Rust Resistant

COLORBOND® rails are made of high-quality steel, so you won't have to worry about any Carport Australia carports being destroyed by harsh weather conditions.

2 COLORBOND® Steel Material

Carport Australia installs carports using 100% authentic COLORBOND® steel, which you can verify by checking the COLORBOND® logo. This guarantees that your carport will remain durable against harsh weather conditions.

6 Easy Maintenance

COLORBOND® Steel requires very little upkeep. All that's required of a Carport Australia carport is a rinse with warm water from time to time to keep dirt from accumulating. Steel survives for far longer than other materials and colours don't fade over time. A COLORBOND® carport doesn't need to be repainted every year!

3 Australia Building Code Compliant

While building codes vary from local council to council, Carport Australia is always code compliant. If you need help sorting through all the building code information that's out there, we're happy to lend our expert guidance!

7 Eco-Friendly and Multifunctional

COLORBOND® steel is made from highly recyclable steel material, allowing it to be upcycled or reused when needed. Carport Australia uses steel components to minimise the reliance on petroleum-based products as well as the mining of raw resources.

4 Warranty & Aftercare Services

In addition to the 10-year warranty offered by the manufacturer, professional COLORBOND®, Carport Australia installation is guaranteed to last for 30 years! All our building and renovation works are covered by statutory warranties under the Home Building Act.

8 Protection from Harsh Weather Conditions

COLORBOND® steel offers protection from UV rays that can damage your car's paint. Excess heat can warp any car's plastic and metal parts, while debris or frozen hail from a storm can do even worse. Carport Australia carports made from durable COLORBOND® steel offer your car protection from the elements.

Customization

Carport Australia offers a wide range of carport styles that you can choose from.

Have something special in mind? We also customise carports based on your home's unique requirements.

COLORBOND® steel can be customised in 22 different colourways, ranging from classic to contemporary shades to fit your individual taste.

Regardless of design, all Carport Australia carports guarantee:

- ✓ COLORBOND® Steel
- ✓ Warranty & Aftercare Services
- ✓ Hassle-Free Installation
- ✓ Customised to Your Needs
- ✓ Building Code Compliant
- ✓ Certified Installers

Insulated Roof Carport

Weather in Australia can be intense! Insulated roof carports can regulate the temperature within your structure, keeping it warm during winter and cool during summer. Insulated roof carports are ideal for areas with fluctuating weather conditions or those areas that get more sunshine.

Attached Skillion Carport

A skillion roof carport is built at an angle to allow rainwater to run off. These carports are attached to your home's current structure which provides increased stability, durability and convenience.

With a Carport Australia skillion carport attached to the side of your house, it's a breeze to get kids, pets and other items from your car into your home.

Free Standing Carport

A free standing carport, also known as standalone carport, is a carport that is detached from your existing home structure and needs support on all sides. Carport Australia installs professionally designed and structurally engineered free standing carports in Sydney.

A free standing carport is designed to give you the flexibility to place your carport at the front, side, or back of your property, depending on your needs or preferences. It is a popular, flexible option because it can also serve as an outdoor gathering place when your car is not parked!

Steel Carport

If durability and strength are what you're looking for, then a steel carport is for you. This type of carport sure provides extra protective covering for your car and belongings for a long period of time. Steel carport designs include cantilever carports, skillion or sloping style, and dome-shaped carports.

If you're looking for a sturdy and durable carport, one of your best options is a Carport Australia steel carport. It can withstand whatever weather conditions your vehicle might encounter.

Flat Roof Carport

Looking for a simple but practical addition to your home? A flat roof carport is easy to install, cost-effective, and only needs minor maintenance. Carport Australia flat roof carports are available in different pitches and designs. They can be customised to include a slight slope and can be designed as attached or free-standing. Flat roofs can be used to cover a single, double, or extra large carport, depending on your space requirements.

Gable Roof Carport

The gable roof type of carport is ideal for structures that need additional stability. These roofs have two sloping sides that meet together at the top and look like a triangle when viewed from the front. You can choose to have a standard gable roof or Dutch gable roof depending on your space, requirements and budget.

Gable roof carports from Carport Australia are popular because they can complement the look of your property beautifully!

Our Services

To ensure beautiful seamless design throughout your entire property, Carport Australia also offers patio roofing, awnings and fencing utilizing the same COLORBOND Steel as your brand new carport!

Carport Australia's patio roofs are designed to look timeless, elegant and stylish, providing the ideal space to entertain guests and enjoy your yard space together.

Our patio builders in Sydney are licensed professionals who will work with you to create high-quality, long-lasting patio roofing for residential and commercial properties in Sydney and the surrounding suburbs.

SELECTION

Our patio roof selection includes:

- Insulated patio roof
- Flat patio roof
- Gable roof
- Skillion/Gable combination
- Skillion roof or sloping patio roofing
- Flyover style
- Louvered patio roof
- Attached patio roof
- Free Standing patio roof

Carport Australia can design and build matching carports, patio roofs, awnings and fences to deliver you the most beautiful home!

Commercial Carport

Commercial carports are covered structures that house vehicles, items, and sometimes people, keeping them safe no matter the weather.

Sun exposure, heavy winds and rain, snow, and falling debris can take a toll on your equipment and vehicles.

Commercial grade carports provide the perfect solution for protecting your personal and business vehicles, heavy equipment, and tools that power your business.

Carports are a great way to create protected space for various commercial purposes.

Aside from protecting your assets, commercial carports also provide your customers with covered parking space.

Many small businesses are turning to carports instead of full garages due to its ease of installation and low cost.

On top of these, commercial carports are easy to install, durable, and require minimal maintenance.

For commercial buildings or businesses, installing a carport comes with a bunch of advantages, not only for you but for your clients or customers as well.

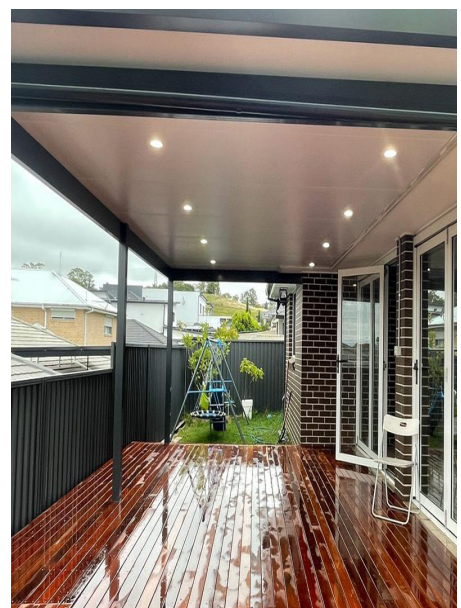

LEADING PROVIDER

Carport Australia is the leading provider of commercial grade carports for businesses and commercial establishments in Sydney.

We offer a wide array of commercial carport designs to complement your business and cater to your specific requirements.

Whether you need a stand-alone or a cantilever carport, our team can handle the job quickly and efficiently.

Our Works

Advantages Of Partnering With Us

There are many benefits to partnering with Carport Australia for your commercial carport needs.

Fully-Engineered

Carport Australia's commercial grade carports are often partially prefabricated structures that are quick for our contractors to put together at the construction site. This means less construction time and lower construction costs. These structures are also easy to repair and relocate. You can make any changes as needed without hassle.

Vehicle Protection

Commercial carports offer protection to your and customer's cars parked against all weather conditions, from hail and snow to heavy rains and UV rays that damage vehicles. Harsh weather can fade the interior and damage the exterior of the vehicles, causing dents, dings, and corrosion. Installing a Carport Australia commercial grade carport in your business location ensures that your employees and guests have a safe place to park their vehicles.

Low Maintenance

Carport Australia's commercial carports are made from durable materials such as steel and brick, and are capable of withstanding harsh weather conditions. There's no need to inspect them regularly and ensure their maintenance because they are built to last for a long time. Even with minimum maintenance, you can still enjoy the advantages of a commercial carport for a long time.

Pedestrian Safety

Carports provide a safe area for employees and customers to wait in if the weather is rough. A commercial carport from Carport Australia is especially helpful for customers who want to enter your building without getting wet in the rain and keeps the area around your business location clear of ice or hail.

Easy Upgrade Solution

Want a new look for your business establishment? Adding a Carport Australia commercial carport is an easy and cost-efficient way to upgrade to your business or office location. The installation is quick and simple and will not cost a ton, unlike other pricey construction projects or renovations.

Curb Appeal

If your building looks bare, you can install Carport Australia's commercial carports to add curb appeal to your location. These structures can be designed to complement the other features and materials used for your structure to get an attractive, seamless look. Installing a carport near your building generates an awning effect.

Aside from providing car protection, commercial carports can also double as a shady place for people to stand under while waiting for their ride, drinking coffee, or meeting other people.
